

ABOUT US

At Launch Networks we believe anything is possible with enough planning and attention to detail.

Founding partners Robert de Burgh-Day & Peter Moncrieff take this approach with every project enabling the provision of consistent, fail-safe high-speed connectivity in even the most remote locations.

We are so confident in our ability to deliver we offer an SLA agreement which guarantees our quality of service.

During the offseason we run several large permanent sites around Victoria from co-working spaces to large event venues such as Lardner park

OUR SERVICES

Event WiFi

Our WiFi solutions, coupled with dedicated onsite backhaul keep congestion low, allowing for a high speed, high capacity user experience.

Payment Networks

Adaptive network topology allows us to build our network to suit preconfigured and highly secure payment systems such as ATMs and EFTPOS services.

RFID Payment Support

Enable online and live top up systems with high priority traffic. Reduce top up and ATM lines while simultaneously increasing customer spend.

Live Streaming & broadcast

Multiple high bandwidth uplinks coupled with our dynamic VPN allows for high availability uninterrupted streaming from a static IP address.

Guest WiFi

Customizable captive portal solutions allow for capturing data used in remarketing and generating additional revenue through paid access.

Site & RF Surveying

To ensure we deliver only the best service we employ high tech 3D site mapping, active RF surveying and RF simulations to assist with planning & execution.

End to End Managed Services

Add or remove services as required - Have onsite technicians for support or we can manage your services remotely.

Remote Locations

Our connectivity partners allow us to find a solution no matter how remote you are.

CCTV

Our high capacity networks provide a foundation for high definition camera surveillance including PTZ and number plate recognition.

Outside the Square

Got a problem that you think might be solved by a bit of lateral thinking? Contact us with your unique problem and we can provide an equally unique solution.

WHAT OUR CLIENTS ARE SAYING

Unify Gathering

Diligent and Hardworking. Having had major network issues at our previous events LaunchNet were able to deploy infrastructure and networking into a greenfield site to support credit card processing, internal and external site communications and staff/contractor internet access resulting in a major step change in the delivery of the event

Rhett McLaren - Director

Beyond the Valley

Launch Networks have helped us at many of our most challenging events, from facilitating a 5-hour Boiler Room live stream at the foothills of the Grampians while also servicing every other aspect of the festival to running all the services at Beyond the Valley, the Launch Networks guys are a pleasure to work with.

Untitled - Christian Serao - Director

Woodford Folk festival

There's no two ways about it. As a major festival set on 500 acres with 13 bars, over 150 stall holders, 2,600 volunteers and 126,000 attendee days, Woodford Folk Festival can be a challenging environment. Pete and Rob at Launchnet consistently deliver, and then some. Ten out of ten from us!

Ben Sirl - Operations Manager

Pitch Music & Arts

Launch Network have gone above and beyond at Pitch Music & Arts Festival. They managed to pull off a live stream connection in rural Victoria that even Boiler Room didn't think was possible, all while running the internet services across the rest of the festival site. We can't wait to have them back next year!

Novel - Georgia Madden

One Roof Co-working

Launch Networks has looked after all of our IT services on site since we opened, is this time we have rolled out many upgrades as we have expanded, they have always given us they best level of service, Launch will be helping in the same capacity when we move later this year.

Sheree Rubinstein - Director

Lardner Park

Launch Networks have been providing high-speed data services to Lardner Park, a 350-acre Events and Exhibition space. Rob, Pete and their team ensure that every event at Lardner Park from 1000 people up to 20,000 has access to uninterrupted high-speed data services across the site. Since coming onboard, Launch has received glowing reviews from all event coordinators.

Josh Last - Operations Manager
