

## 2022 Steer Trial

Celebrating 47 years  
of steer trials at Lardner Park

We are excited to announce that applications are NOW OPEN for the 2022 Lardner Park Steer Trial.

After the success of last year's trial, we are sure that 2022 will be bigger and better than ever with numbers expanded to enable even greater data output and results for all entrants. With our stellar line up of sponsors and partners, we'll be able to share information and innovative ideas through our regular e-newsletters and correspondence. Our property manager Anthony Willems, will provide regular updates on the condition of your steers, their progress and the current weather situation.

The 47th Lardner Park Steer Trial will begin in July, with entrants invited from anywhere in Australia, to arrive on the property in late June. Compliant with the Coles QA grass fed program, the aim is to achieve the best outcomes for both during trial information and data collection, and purchase price on carcass meat when the trial is turned off in late November, as a domestic grade with a specification of between 220-330kg HSCW (hot standard carcass weight).

As the only grass based Steer Trial in Australia, producers across multiple states are provided the opportunity to assess cattle under independently controlled grazing conditions. Entrants will be required, as part of the application process, to declare entered steers have not been grain fed since birth. Entry is by application only, which can be found on [www.lardnerpark.com.au](http://www.lardnerpark.com.au) on the Steer Trial page.

before Friday 17th June 2022

## Sponsors, prizes and rules

Sponsors and all prizes will be announced during July.

The trial will be extensively promoted on social media, through publication media partners and industry partner channels. Entrants and subscribers are encouraged to attend the monthly weighing days, however where not possible, information will be emailed and online monthly weigh-in data will be available.

Results will be formalised by Agriculture Victoria and the 2022 trial awards presentations will occur at Farm World 2023 at Lardner Park. Each producer (per pair) will receive an invitation and 2 entry tickets to attend the special presentation on Friday 24th March where you can then join in the networking and hospitality at our 'Yarn at the Farm' activation at the historic Rotunda.

**Carcass assessment uses the Meat Standards Australia (MSA) grading scheme. Awards include:**

|                                      |   |
|--------------------------------------|---|
| Domestic Weight Gain & Carcass Award | Overall recognition with 1st, 2nd and 3rd places, based on highest combined points calculated as 45% weight gain and 55% carcass assessment |
| Highest Weight Gain                  | For a pair calculated as highest combined weight gain   |
| Highest Carcass Score                | As a pair calculated as highest combined weight gain  |
| Eating Quality Award                 | Using the standard national measure (MSA Index)   |

No individual steer/carcass will be disqualified from the awards “Domestic Weight Gain & Carcass” or “Highest Carcass Score” if it does not meet carcass specifications. Eligibility for the “Highest Weight Gain” award requires each carcass to fall within the specified weight range. Two penalty points per kilogram will apply to carcasses falling outside the HSCW weight range of 220-330kg, over or under (for example, a carcass weighing 338kg, so 8kg over, will receive a 16-penalty point reduction).

To receive regular updates on the program, content sharing and an opportunity to access trial data, please sign up via the website on the Steer Trial page.

# Terms & Conditions of Entry

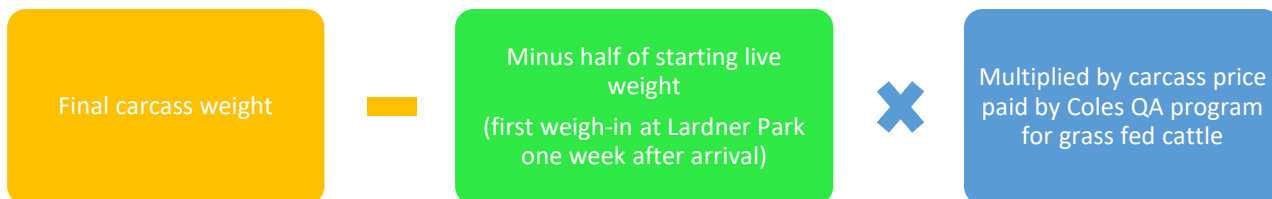

|   |
|---|
| Entries close Friday 17 <sup>th</sup> June 2022   |
| One entry shall consist of a pair, being two steers of the same breed   |
| Lardner Park retains the right to accept or reject entries at any time as best fitting to the trial   |
| Lardner Park Steer Trial is seeking entrants of British/European cross breeds or British origin. Direct European breeds are not suitable for this trial due to fat level coverage   |
| Cattle must be delivered to Lardner Park cattle yards before 4.00pm on Tuesday 28 <sup>th</sup> June 2022. Please notify the Property Manager of your cattle's estimated time of arrival. The competition will start Tuesday 5 <sup>th</sup> July 2022 after a one-week settling-in period  |
| Turn-off date has been set for Monday 28 <sup>th</sup> November. Lardner Park reserves the right to change these dates if deemed necessary for reasons such as extreme seasonal conditions  |
| Lardner Park Steer Trials overall historically average better than 1kg/day, however no performance guarantees are given   |
| Steers must have been weaned for a minimum of a fortnight   |
| Declaration is required that cattle have not been grain-fed since birth.<br>Coles Supplier Vendor Declaration to be completed and returned with the application or on arrival of cattle.  |
| Cattle will be weighed at regular intervals between arrival and late November turn-off date   |
| To meet the Coles grid at the end of the trial, steers should be entered between 280-385kg liveweight. Steers outside this weight range may only be accepted under the discretion of the Lardner Park Property Manager and the Coles Procurement Officer. Steers that fall considerably outside the Coles grid may find they are not accepted or will be heavily penalised on price upon processing. Any queries on the weight criteria prior to entry or transportation, please phone Anthony Willems on 0408 624 620. |
| Data will be collected on the life of the steer including DAYS OF AGE and WEIGHT AT BIRTH (if known)  |
| All steers will be drenched upon arrival at Lardner Park with Bovishield MH-One and a broad-spectrum drench – 7-in-1 with a second vaccination booster later in the trial.  |
| Entered pairs of steers may be split into separate mobs to trial the use of a mineral to increase the potential of weight and carcass. The trial has the unique opportunity to trial a product across multiple breeds to see any benefits which producers can learn from. As an example, in 2019 one of the pairs from each entrant received a Rumifert capsule, which we could measure the benefits of through monthly weights and carcass assessment  |
| Steers must be effectively castrated or subjected to disqualification, and must be de-horned prior to arrival at Lardner Park   |
| Steers must not have received a Hormonal Growth Promotant and if found at Lardner Park or the abattoir to have received an HGP, will be disqualified  |
| Best practice is applied by our qualified Farm Manager to ensure proper management of cattle in the Trial, however if any livestock deaths occur, no responsibility is accepted by Lardner Park. Breeders may consider insuring cattle during the Trial with their normal insurer. In the event of a death occurring, a steer having to be destroyed or withdrawn, the remaining steer of that entry may continue in the Trial but will not be eligible for final awards.   |
| All weights are final. Steers will only be re-weighed at the discretion of Lardner Park. Judges' decisions are final, and no correspondence will be entered into  |
| As applications are received, Lardner Park will identify producers who are in close proximity to each other that may have the ability to share transportation to Lardner Park. For example, a delivery point at the Wangaratta saleyards is being organised for producers in the north-east region of Victoria. We will advise details as soon as possible.   |
| On arrival steers will be marked and identified with a 2022 Lardner Park Steer Trial ear tag. Original farm tag numbers must be attached to the steers prior to arrival, eliminating any processing errors on delivery to Lardner Park. It is recommended farm tags be placed on the offside or right-hand side when looking at the rear of the animal. All cattle must have compliant NLIS tags.   |
| Lardner Park reserves the right to reject cattle deemed inappropriate on the day of delivery with the option of these being sold on the local market or returned to the owner's property at the owner's expense.  |

# Fees

Entry fee cost is \$175.00 per pair – an invoice will be emailed on receipt of application which is due and payable before steers arrive on the property. If your application is not successful, payment will be refunded in full within 24 hours of notification. Entry fee includes the right to:

- enter 1 x livestock pair compliant to the Steer Trial (there may be an opportunity to enter multiple pairs)
- access to trial data
- participate at the monthly cattle weigh-in and morning tea catered presentations (these will not occur at every weigh-in, but several will be scheduled throughout the trial)
- access to industry experts from the Steer Trial Partners & Sponsors
- attend Farm World 2023 and the Steer Trial awards presentation

Carcass value improvement at the end of the trial is distributed on a 50/50 basis with Lardner Park. Increase in carcass value will be calculated on the following formula:

Cattle not meeting weight and fat requirements can be penalised by Coles. Any other costs incurred for the successful running of the trial will be deducted off the final payment on the basis of 50/50 (for example: veterinary fees).

## Judging Details

|                     |   |
|---------------------|---|
| Overall Recognition | Recognising 1 <sup>st</sup> to 3 <sup>rd</sup> achievers, this prestigious award is based on a combination made up from 45% gain of weight and 55% quality assessment of carcass                              |
| Eating Quality      | Using the standard national measure (MSA Index), scores reflect the combination of predicted tenderness, juiciness, flavour and overall liking of beef  |
| Live Weight Gain    | Increase in live weight gain is measured as the difference between final live weight (last weigh-in) and the initial live weight (weighed 1 week after arrival)   |
| Carcass Evaluation  | The MSA judging system is used in judging the carcasses with the assessment including Bos Indicus Content, Marbling Meat Colour, pH, Fat Thickness, Carcass Weight, Ossification and Day's Age of the product |
